Subject: men's survey

Hello,

I'd like to clarify which questions constitutes "men's survey" and how it differs from other questions answered by the men or, as I've seen mentioned elsewhere on the DHS website, "man's questionnaire". Is the men's survey just all questions answered by men (i.e. those in the MR datasets), or is it a specific module? How is it different than the man's questionnaire?

Thank you very much.
