Dear DHS,

The latest update to the Malawi 2013 - 2014 data (MWFC6KFLSP.DTA) includes the records for the 83 facilities that were unable to complete the assessment for various reasons. However, the accompanying location data do not appear to include coordinates for these facilities. It would be helpful to have these coordinates to know where uncertainty in mapping the system is located. Were these coordinates collected? If so, can they be made available?

Thank you,

Hannah
