Dear all,I want to create Women Empowerment Index (WEI) from variables ,V743A,V743B,V743D,V743F,V744A,V744B,V744C,V744D,V744E etc. My Question is,When I have given a value "1" for variables V743A-V743F having Decision alone/jointly for indicating Women are Empowered, A value "0" for women aren't Empowered. What value I should give for V744A,V744B,V744C,V744D & V744E to indicate woman is Empowered? I consider,for example if V744A is yes give a value "1" to indicate woman is Empowered & for "No" response give a value "0" to indicate not empowered. Am I correct? I didn't understand the variables V744A,V744B,V744C,V744D & V744E in line with the concept of Women Empowerment. I need your assistance and support!! Please help me my Hero. Respectfully,Hassen
