Dear DHS support,

One of the datasets listed in the Excel file provided 13th August 2018, Indonesia 2012, doesn't have the listed menarche variable. The related DHS report confirms that the question was asked to women (13. KNOWLEDGE AND EXPERIENCE ABOUT HUMAN REPRODUCTION SYSTEM Q1305 How old were you when you had your first menstruation?) but I cannot find a corresponding variable in any of the data files and it isn't mentioned anywhere in the Individual Recode Documentation either.

Please can you clarify whether age at first period is available for this survey, and if so, how to access it.

Many thanks,

Laura
