I'm studying the ages at first marriage and birth using the NFHS using survival analysis. I have a couple of questions:

1. In 1992-3, I can't seem to find the century month codes for age at first marriage. Is this variable not available for the first round of the survey?
2. Does the CMC for date of first marriage (v509) refer to the marriage date pre- or post- gauna in 1998-9 and 2005-6?

Thanks!
sowmya.
