Dear concern
I am using the Bangladesh (BDHS-2017-2018) KR dataset. But I am a little bit confused about how to calculate the IPV. In R, I want to calculate the IPV value as shown in the report.

Please suggest me.

Thank you

Following is a response from DHS staff member, Tom Pullum:

Please identify a specific table in the report on this survey that includes this indicator.

Dear Tom Pullum
Thank you for your reply. I want to make the "Table 10.2: Vaccination by source of information" page 163

Can you please give me the R code or stata code for this table of BDHS-2017-2018 data file. Specially how to calculate the "IPV" under polio

Thank you

Following is a response from DHS staff member, Tom Pullum:

Have you gone to GitHub (https://github.com/DHSProgram) to see whether this is included in our standard code? Let us know if you do not find it there.

Dear Tom Pullum
Thank you for your reply. However, I already checked and did not found the calculation. Please guide me with the R code or STATA code.

Thank you
