Subject: Merging child file with wealth index for Brazil 1996 DHS Posted by shu2013 on Wed, 19 Jun 2013 15:11:44 GMT View Forum Message <> Reply to Message

As others have mentioned the HH id number in the wealth index does not match the HH id variables in the child file. Help is much appreciated. Thank you!

To merge please use CASEID and WHHID. CASEID = HHID+V003, so you take the first 12 characters as identifiers and match it with the WHHID of the wealth index. WHHID is the equivalent of HHID and it is the first 12 characters of CASEID.
