Hi, I would like to construct CWI for some countries including Burundi 2010, following the paper:

[http://www.dhsprogram.com/publications/publication-MR9-Metho dological-Reports.cfm](http://www.dhsprogram.com/publications/publication-MR9-Metho%20dological-Reports.cfm)

I have got alfa and betas for some of them, just wondering if it would be possible to have them for 2010 Burundi also.

Thanks!

Dear User,

The CWI computations were done with the surveys that we had wealth score records of and were available at the time we started analysis. Burundi 2010 was not included in that group so we do not have coefficients for it.

If you have additional questions, please feel free to post again.
