Hi,

thank you for all the help on the various factor weight files.

There appear to be some large differences between the values in the Excel factor weight file and the dataset for Cote D'Ivoire DHS 2011. For example, the mean given for 'animal drawn cart' in the Excel file (common tab) is 0.46 which would imply that 46% of the population has an animal drawn cart. However, the dataset indicates that this should be 2.8% (according to the variable HV243B) - a result that is more in line with general trends in animal drawn cart ownership. Similarly, the mean for Tractor in the Excel file is given as 0.48 while the dataset indicates that 0.1% of the population owns a tractor (according to variable SH118G).

Thank you for your help,

Kenzo

Hi there,

I was just wondering when we could expect some information on this query? There's been some demand for use of this wealth index.

Thank you for your help and for uploading all these wealth index files - it is much appreciated.

Kenzo

Hi Kenzo,

We are working to resolve the issues with the wealth index for this survey and will post an update when resolved.

Regards. Trevor

Dear Trevor,

do you have any updates on when this issue might be resolved? We have some people hoping to use this in Cote D'Ivoire surveys.

Thanks,

Kenzo

The wealth index data for Cote D'Ivoire DHS 2011-12 has been revised to fix the problem found and a new version of the recode datasets has been released, as well as an errata for the final report.
