---

Hi,  
When will the data of the SPA survey conducted in 2015 in Nepal be available?  
Will there be information on the existence or accessability of comprehensive abortion care (CAC) services at the district level?  
Thank you

A response from Dr. Hamdy Moussa, survey manager for the Nepal SPA 2015,  
Quote:  
The data of the 2015 Nepal Health Facility Survey will be available shortly after the final dissemination seminar (dissemination seminar is expected to take place during the month of December, 2016 or January 2017)

We collected some data about the availability of Comprehensive Abortion Care (Applicable to PHC and above). The 2015 NHFS provides representative results for Nepal, for different facility types (public hospitals, primary health care centers [PHCCs], health posts [HPs], urban health centers [UHCs], stand-alone HIV testing and counseling sites [HTCs], and private hospitals), for different managing authorities (government and private), for each of the three geo-ecological regions in the country, and for the area affected by the 2015 earthquake (14 districts).

Thank you for your post.
