I am using the ALHR50FL.DTA to identify number of migrants abroad at time of survey. I use variables sh201a sh201b sh201 sh202_ sh204_ sh205_ sh206_ etc

I get 5891 international migrants. The ADHS Report notes 6280 international migrants (p259).

I have checked my code and it seems correct. Any help would be appreciated.
