Is there any guidance documents for surveyors and coders on categorising women's and men's occupations for the 2013-2014 survey? I am referring to the results in the final report (French), sections 3.5.3 (tableau 3.6.1); 3.5.4, (tableau 3.6.2); 3.5.5 (employment type - women). I am curious about how the question was posed and how answers were to be categorised.

Any assistance is very welcome.
