Hi,

I am trying to merge the PR file with BR file for Pakistan. I am trying to use hv001, hv002, and hvidx with v001 v002 and bidx but hvidx seems to run from 1 to 55 whereas bidx only runs from 1-16. Moreover, v001 v002 and bidx does not seem to uniquely identify observations in BR file which is somewhat weird. Can you help please?
