Were do I find dataset with weight and height for both men and women? I need to calculate BMI for both males and females(15-49 years)
I tried accessing biomarkers dataset under South Africa 2016,have not succeeded. Kindly assist

Try using the IPUMS-DHS site, which allows users to do a web-based search on a string or variable. If you click on the variable name, you can learn more about the variable, including its codes and frequencies, meaning, universe (who was asked the question), and question wording. Easily log in with your DHS user name email and password.
