Hi,
I want to calculate exclusive breastfeeding by using Bangladesh Demographic and Health survey 2014 data. I used the KR file and code give below. However, by using these code I found only 13.9% exclusive breastfeeding. In BDHS 2014 report this percentage is 55%. Can anyone help me to calculate an exact figure of exclusive breastfeeding by using BDHS 2014 data?. Here the comment i used

```
