Hello,

I am trying to replicate table 9.9 from EDHS2011, particularly looking at the timing of first PNC check up for the mother, in the categories that are present in the report. These are "Less than 4 hours, 4-23 hours, 1-2 days , 3-6 days and 7-41 days". I wanted to ask how generate those categories from the m71 variable in the birth recode file.

Thank you.
