Subject: sampling stratification of the Cameroon DHS 2011, 2004, 1998 and 1991 data
Posted by Agbor on Mon, 11 Jul 2016 11:02:08 GMT

Hi all,

Please I will like your help. I am working with the cameroon DHS women Survey for the years 1991, 1998, 2004 and 2011. I am unsure if the syvset command is this

```
gen weight = v005/1000000
svyset [pweight=weight], psu(v021) strata(v023)
```

or

```
gen weight = v005/1000000
egen strata = group(v024 v025), Label
svyset [pweight=weight], psu(v021) strata(strata)
```

Thank you
Agbor
