---

I have merged the PRfile and IRfile and MRfile

I am kindly inquiring whether it is possible to link household members age 6 to 15 years to their mother's age and education level and occupation and also the same for the father's age, education level and occupation.

If it's possible how can I do it?

I had thought of using the mother's line number(hv112) and father's line number(hv114)but I cannot make headway on how to use them to link the mother's age, education level and occupation to a household member age 6 to 15 years.

Thank you.
