There is a question on "reason for not using contraception" in DRC 2013-2103 DHS. I cannot figure out the skip pattern for this question. It's been asked from about 6000 women. Non-users are more than this and non-users who don't want children in next 2 years are much less than this number. The question is not in the questionnaire in the appendix of the final report (or I could not find it!). Any ideas how I can figure out the skip pattern?

The variable names are V3A08A-Z .
