Dear User,

A response from Dr. Tom Pullum:

Quote:

The g variables in the IR file include gidx_01, gidx_02, etc. These indices provide a link to bidx in the KR and the BR files. For example, if gidx_01 is 3, then the daughter given by g121_01 is the child with bidx=3. There have been some other posts on this topic, including another one today about FGC in Egypt, that you may want to check.
