
Subject: Mozambique Regions Code not available?

Hello,

I was trying to find what the recode values are for the V024 or V101 variable in the Mozambique 2011 survey. I know that these are regions code and for Mozambique there are 11, which leads me to believe that it corresponds to the 11 states of the country, but I would like to know if this is true and which state is which number. Anybody have any idea or experience with this?
I was curious about the regions as I am studying the malaria prevalence, which can definitely vary by more than just urban and rural.

Thank you,

Sonja
