Dear User-RHS,
The variable you refer to are coded as follows in the recode application:

```
{ respondent reasons for not having sex }
V633A = YesNo( Q947A );     { husband has STD }
V633B = YesNo( Q947B );     { husband has other women }
V633C = YesNo( Q947C );     { recent birth }
V633D = YesNo( Q947D );     { tired, mood }
V633E = notappl;          { !! CS }
V633F = notappl;          { !! CS }
V633G = notappl;          { !! CS }
```

Let me know if you have additional questions.
Thanks!
