Dear Liz,

Apologies for the delay. I first went through a subset of the datasets that I am interested in but then decided to cover all of them. I attach what I think is a complete list for sub-Saharan Africa. It does not include all the IR and MR datasets for that country group, but only because the datasets missing from the list did not have information on occupation.

Specifically, I am interested in the labels for v704 and v716. I realize that this is probably too large a problem for you to address. However, I would be grateful for any information you may have that could help me in filling at least some of the holes.

Many thanks in advance,

Sebastian
