Dear User,

Please look for variables:

S567A Does child play with homemade toys

S567B Does child play with toys from store

S567C Does child play with household objects

These are survey/country specific variables. In most cases you will be able to find them starting with the letter "S" but with the same number as in the questionnaire. Also there is a list of all country specific variables in the documentation distributed with the data you downloaded. This document is an MS Word document called RWIR70.doc

Thank you!
