Subject: SAS formatting programs update Posted by mwoolf on Mon, 31 Oct 2016 16:03:51 GMT View Forum Message <> Reply to Message

Hello,

I realized that I'm getting error messages because I downloaded the SAS files not ASCII files. Thus, my log says, "file is in use".

So, if I want to use the SAS files (sas7bdat) I cannot use this program at all?

Thank you for your assistance thus far.
