[quote title=fahad ahmed wrote on Fri, 02 December 2016 07:51]Hi,

I am new to DHS user forum, I want to know how can I create a variable place of last delivery from the birth in last 5 years. I am using spss, will be thankful if you provide me the syntex or method for it using SPSS.

For example there is a variable V401 Last birth a caesarean section, same I want to create a variable " place of last delivery"

Thank You.
