Sure and thanks. This is the code:

```
df <- df %>%
  group_by(hhid) %>%
  mutate(idmother = ifelse(hv112>0 & under17=="yes", hv112, NA))
df <- df %>%
  group_by(hhid) %>%
  mutate(agemother = ifelse(!is.na(idmother), hv105[idmother], NA))
```
