Thank you for your help with the IPUMS data. I want to merge IPUMS-DHS data with the original child recode dataset for Nigeria for the 03, 08 and '13 surveys.

On the original dhs dataset, I created sample and was able to create 'idhspid' for 03 and 08 surveys but the 2013 survey turns out differently - does

not leave any space between the sample identifier and the caseid. I will appreciate your advice.

TA
