Hi,
Am trying to create the CWI using 2007 Zambia DHS.

```
.   * CWI score = Alpha + Beta * v191
. gen cwi_2007 = -0.6714665 + 1.0443476*v191

. sum cwi_2007

    Variable |    Obs     Mean   Std. Dev.    Min      Max
-------------+--------------------------------------------- ----------
    cwi_2007 |   7146   19388.11   112233.5  -121483.4   264237
```

The output seems incorrect and need assistance understanding where I have gone wrong

Many thanks
