Following is a response from Senior DHS Stata Specialist, Tom Pullum:

Quote:Why do you need to do this? Several examples of merging have already been posted on the forum. However, many variables are in all three files or in pairs of the three files and do not need to be merged. The main things you have to determine is what are your cases and what are the variables you want to retain or add. Ask again if you can be more specific and if what you need is not already posted.
