Following is a response from Senior DHS Stata Specialist, Tom Pullum:

Remember that the IR file consists only of women age 15-49. If there is no woman in that age range in the household, you will not get a match between the HR and IR file. In NMHR61FL.dta, hv010 is the number of eligible women in the household. This number is 0 in 2889 (29.33%) of the households. Taking into account the response rate for the women, 3177 unmatched households seems about right.
