Dear DHS Experts

I Have confusion on the number of sampling strata selection in 2011 Ethiopian DHS which stated on page 276 Appendix A section in the final report stating: 'In total, 23 sampling strata have been created because Addis Ababa region is entirely urban', in which I have a confusion how many strata is/are selected for each region to come up with the above number (23). I appreciate your usually support regarding questions on DHS report.

Regards
