Following is a response from Senior DHS Stata Specialist, Tom Pullum:

Quote:

I recommend the following modification:

```
svyset psuid [pw=v005], strata(stratumid) singleunit(centered)
```

The psu is specified without "psu()", you do not need to divide v005 by 1000000, the comma goes after the specification of the psu and pweight, and you are likely to have a crash if you do not include singleunit.
