To follow up on this, I am using Tanzania 2015-2016 data and there is no published recode manual for DHSVII. So- I would like to confirm that V313 depicts what type of contraceptive method is used. What definition is used for "modern method," "traditional method," and then "folkloric method" respectively? Just looking for their clear definitions and what they each include so I may understand them further in my analysis.

Thank you!
