Subject: Re: Weights for regression analysis Posted by Bridgette-DHS on Tue, 14 Mar 2017 14:29:44 GMT View Forum Message <> Reply to Message

Following is a response from Senior DHS Stata Specialist, Tom Pullum:

Yes, you should include weights in regression analysis. In Stata, these would be pweights and you would include something like "[pweight=v005]" before the comma in an estimation command. There have been many forum posts on weights.
