Dear User, A response from one of our experts, Han Ridders:

Quote:

What I see here is that in the KIR, "ADDO" - accredited-drug-dispensing-outlets, is included for "Percentage for whom advise or treatment was sought from a health facility or provider" while in the Final Report this is excluded. Please see table 10.6 of the report also (Prevalence and treatment of fever) where two columns with and without ADDO are presented.

Pages 211-212 of the final report.
