As I did for Colombian files 2010, I want to merge BR, PR, and IR files from Colombia 1995.
I am following the instructions that you gave me to 2010data.
My questions is: which variable should I us to merge BR and PR files 1995?
One of the variables that I used for 2010 data doesn't exist in 1995 (b16 Child's line number in household)
Thanks
