Dear all,

Where can I find the specifications of the variables from the dataset of Egypt 2014 (EGIR61FL)? I am currently searching for the questions used, but I do not see that the questions from the questionnaire (final report Egypt DHS 2014) are in accordance with the variables in the dataset. I used the document "Individual Recode Documentation Egypt (DHSVI) Version 1 Doc 01 EG6" but I still did not find out.

For example, variable v714, which question is used for this variable? Is it question 814 from the questionnaire? And s12 is that question 808 from questionnaire? I do not see a pattern.

Thank you in advance.

Regards,
Sara
