Subject: How to create the variable "family arrangement"
Posted by flaviaaa on Thu, 23 Jan 2014 12:26:27 GMT

Hey all,

I am using Brazil data (DHS 1996). I do need to create the variable "family arrangement".
It`s seems to be derived from "relationship to head" variable.
Can you help me? Do you have a syntax for this?

Thank you,
Flávia
