Dear DHS forum,

unfortunately I can't find any information regarding ethical consideration stated in the final report for the Tanzania DHS 2015-2016 except the informed consent for blood collection from children under five years old. I have tried e-mailing NIMR which is the official authority for approving research in Tanzania but their e-mails appear to be broken.

Does anyone have information regarding the ethical approval and considerations of the 2015-2016 DHS in Tanzania?

Kind regards,
Fredrik
