Following is a response from DHS Senior Research Associate, Lindsay Mallick:

Table 9.1 on page 113 of the final report
(<https://www.dhsprogram.com/pubs/pdf/FR311/FR311.pdf>) contains the information you are requesting. The variables you would need to calculate this are: v238 (births in the last three years), m14_1 (number of ANC visits- to determine any ANC), and m2a_1 through m2n_1 (for information on who provided ANC). The code will depend on which statistical package you are using.
