Dear Trevor,

I am trying to calculate the HAZ and WAZ for 1992, 2000, 2006. I understand that you say these can simply be downloaded in a "seperate file" which is available. Is this downloadable file located where we download the other datasets for a sepcific countrty? I cannot fid this. And if so, how is it matched to the individual data for a child/ mother characteristics in the other files/

Gowo
