Hi,

I am working with a couple of DHS surveys and I encountered the problem of strata with single PSU in three of them:

- 1)Tanzania 2011
- 2)Nigeria 2013
- 3)Cameroon 2004

I would like to ask what it means/why that is the case that all of the strata in these surveys have only one PSU? How should I deal with this problem if I want to use the svy: command in stata to account for the survey design?

Many thanks for any suggestions,
Ewa
