Subject: MERGING THREE DHS DATASETS Posted by kalonga75 on Sat, 13 May 2017 22:11:43 GMT View Forum Message <> Reply to Message

I would like to find out if its possible to merge multiple DHS datasets. I am using Zambia DHS datasets for 2001/01, 2007 and 2013/14. I would like to like to merge Women Questionnaire and Male Questionnaire and then link them to HIV Test Results. How do i go about it in STATA?
