Subject: ACT - Malawi 2015 Posted by ICEH on Fri, 19 May 2017 17:19:05 GMT View Forum Message <> Reply to Message

Dear all,

We are trying to reproduce the results for use of artemisinin-based combination therapy in Malawi 2015-16 (table 12.13), however, all variables for calculate this indicator are missing in the KR dataset.

We are using the dataset version 70. Is it possible that the results were calculated in the older version?

Thank you in advance!
