Subject: SPSS syntax Infant and Child Mortality NDHS
Posted by Ayoade on Fri, 09 Jun 2017 20:38:01 GMT

Hello,
I'm new to this forum. Would appreciate it if someone could post SPSS syntax/Excel files for calculating infant, child and under-5 mortality rates for the 2003, 2008 and/or 2013 NDHS. So far I have found one or two files on this forum but they are either STATA files or files that don't work well at reproducing rates shown in the DHS reports for Nigeria.
