Dear User, You may want to unzip the files with the program which comes with your operating system before trying to use them in SAS. Please let us know if that works. If you don't have a program like that on your computer, you can download a trial version of WinZip at <http://www.winzip.com/landing/download-winzip-v1.html?target=br&gclid=CN2b2tbFwNQCFQqlaQodqnIA7g>
