Following is a response from Senior DHS Stata Specialist, Tom Pullum:

The first problem I see is that b8 gives age in years, not months. In the surveys you are using, age 0-5 completed months is given by v008-b3<6.   The SPSS code for EBF and partial BF is given in the attached text file. You may have to modify it slightly based on the specific codes in these surveys. You may also want to look at this: http://www.ghspjournal.org/content/2/3/355.full. Let us know if you still cannot get a match. Good luck!
