Thanks so much, this has been really helpful. I have run the syntax but I am getting values a little different from the NDHS report values, for example, I got a 17.2% for EBF, whereas the report states a 17.4% I would like to know if there's an explanation for this or if I'm not doing something right. Thanks

I have used HW1 as age in months and I got the same result as using v008-b3.
