Thank you for your detailed response. Just to follow up in regards to 2003.

I have already found m50 and m51 but I thought these two variables are for mothers. In 2014 survey for example, there are 2 other variables, m71 & m72 which corresponds to the baby. My question is that I could not find such variables in 2003; unless m50 and m51 are for both mother and child. Could you please let me know? Thank you.
